

## The Company

Ahcil Laboratories, Inc. is a company engaged in the manufacture of organic and naturally occurring components for cosmetics, pharmaceutical, and agricultural use. Ahcil's products are extracted, using a proprietary procedure, from home-grown fruits that produces the natural Alpha Hydroxy Acids commonly known as AHA. Subsequent laboratory tests confirmed that the extract is predominantly lactic acid. In addition, the tropical fruits used for the process are also very rich in other nutrients such as vitamins C, beta carotene, antioxidant lycopene, among others. Combining these ingredients produce excellent antifungal and antibacterial properties.

## Award

Antica won the Alfredo M. Yao Intellectual Property (Most Promising Category) Award sponsored by Philippine Chamber of Commerce and Industry (PCCI) and Intellectual Property Office (IPO) at the Manila Hotel last October 22, 2009.
